

Elements of Functional Analysis

Francis Hirsch, Gilles Lacombe. Function Spaces and Their Duals. The Space of Continuous Functions on a Compact Set. This book arose from a course taught for several years at the University of Evry-Val d'Essonne. It is meant primarily for graduate students in mathematics. The second edition of this successful textbook, first published in , retains the aims of the first, namely to provide a truly introductory course in functional analysis, but the opportunity has been taken to add more detail and worked.
